PROFESSIONAL SUMMARY

Backend Java developer focused on REST APIs with Spring Boot, JWT authentication and PostgreSQL. I build layered systems with database versioning via Flyway and unit testing. Looking for a Junior Developer or Internship opportunity.

TECHNICAL SKILLS

Java, Spring Boot, Spring Security (JWT), Spring Data JPA, REST APIs, SQL, PostgreSQL, MySQL, Flyway, JUnit, Docker, Git/GitHub

SOFT SKILLS

Collaboration, Communication, Emotional intelligence, Organization

PROFESSIONAL EXPERIENCE

Flexcon – Vivo Empresas Partner | Business Intelligence | Jul 2026 – Present
- Analyzed business data to support strategic decision-making, including defining the ideal customer profile
- Monitored competitors and mapped market movements

Loja 180 Graus | Store Associate | Dec 2025 – Jul 2026
- Managed inventory and reconciled invoices, with a focus on record accuracy

RELEVANT PROJECTS

Med Voll –
Java | Spring Boot | PostgreSQL | Spring Data JPA | Flyway
- Exposed REST endpoints for managing doctors and patients, with validation via Bean Validation
- Versioned the database schema with Flyway, making it reproducible across environments

Pedidos-Saga –
Java | Spring Boot | Kafka | Debezium | Redis | Resilience4j | Kubernetes
- Designed a distributed order marketplace with a choreographed saga across multiple services, using Outbox + Debezium (CDC) to guarantee atomicity between state and event
- Significantly reduced end-to-end saga latency by scaling replicas, validated with load testing (k6)
- Ensured resilience with Resilience4j, Redis caching, and automated testing, including chaos testing (kill -9) and Kubernetes with HPA

QR Code Generator API -
Java | Spring Boot | AWS S3 | Hexagonal Architecture | Ports & Adapters
- Decoupled business logic from infrastructure using hexagonal architecture, making the storage service easy to swap
- Refactored after a technical code review and added unit test coverage

PicPay Challenge –
Java | Spring Boot | PostgreSQL | Business Rules
- Implemented transfers between users with business rule validation and relational persistence, per spec

EDUCATION

- B.S. in Information Systems | Centro Universitário de Patos de Minas (UNIPAM) | *Expected: 2030*
- Technical Degree in Administration | UNIPAM | Completed: 2025

CERTIFICATIONS & ADDITIONAL TRAINING

- Backend Developer Program (Alura) – In progress: Java, RESTful APIs, Spring Boot, and application architecture

LANGUAGES

- Portuguese – Native
- English – B1 (Intermediate)
