

MATHEUS FIDELES ARAÚJO

Backend Developer Java | Spring Boot | REST APIs

+55 (34) 99798-5528 | matheusfidelesaraujo94@gmail.com | linkedin.com/in/matheus-fideles-46b932313 | github.com/matheusfideles-stack

PROFESSIONAL SUMMARY

Backend Java Developer focused on developing robust and scalable REST APIs with Spring Boot. Hands-on experience in microservices architecture, JWT authentication/authorization, relational database integration, and hexagonal architecture. Working in Business Intelligence with data analysis and business insights. Seeking opportunity as Junior Developer or Intern with interest in scalable backend development and software engineering best practices.

TECHNICAL SKILLS

- **Programming Languages:** Java (primary), C
- **Frameworks and APIs:** Spring Boot 3, Spring Security (JWT), Spring Data JPA/Hibernate, REST APIs, hexagonal architecture
- **Databases:** MySQL, PostgreSQL, SQL (relational modeling), Flyway (migrations), optimized queries
- **Cloud and DevOps:** AWS SDK v2 (S3), Docker, Docker Compose, Git/GitHub, Maven, Gradle, Insomnia
- **Architecture and Patterns:** Layered architecture, hexagonal, OOP, SOLID, design patterns, System Design
- **Testing and Quality:** JUnit, unit testing, continuous integration, global exception handling

PROFESSIONAL EXPERIENCE

Flexcon – Vivo Business Partner | *Business Intelligence* | **Jul 2026 – Present**

- **Analyze commercial data to support strategic decision-making**
- **Monitor competitors and map market movements**
- **Define ideal customer profile through data cross-referencing**
- **Support business intelligence and market trends analysis**

Loja 180 Graus | *Store Operator* | **Dec 2025 – Jul 2026**

- **Cash register operation and inventory management**
- **Control invoices and accounting reconciliation**
- **Administrative routines with focus on records integrity**

RELEVANT PROJECTS

Med Voll – Medical Clinic Management System github.com/matheusfideles-stack/Med_Voll

Java | Spring Boot | PostgreSQL | Spring Data JPA | Flyway

- **System for managing doctors and patients in a clinic with Spring Data JPA, Bean Validation validations, complex entity relationships, versioned migrations with Flyway, and layered architectural pattern.**

Screen Match – Series Catalog with AI Analysis github.com/matheusfideles-stack/screenmatch

Java | Spring Boot | PostgreSQL | AI Integration | Streams | Collections

- **Spring Boot application that consumes external API (OMDb), persists data in PostgreSQL via Spring Data JPA, performs analysis with AI integration, and generates automated reviews. Utilizes advanced Streams, Collections, pagination, and robust error handling.**

QR Code Generator API – Hexagonal Architecture github.com/matheusfideles-stack/qrcode.generator

Java | Spring Boot | AWS S3 | Hexagonal Architecture | Ports & Adapters

- **API with hexagonal architecture (ports & adapters) for generating and storing QR Codes in S3 via AWS SDK v2. Refactored after technical code review, including unit tests and detailed documentation.**

PicPay Challenge – Transfer System github.com/matheusfideles-stack/transferencia

Java | Spring Boot | PostgreSQL | Business Rules

- **Real technical internship challenge implementing transfer endpoints between users with business rule validations, relational persistence, and error handling according to specification.**

Additional Projects: Authentication & Authorization with JWT • BankSystem-C (terminal banking system) • Tech-Nexus (product manager) • Online Password Generator (responsive) • Information Security Laboratory
github.com/matheusfideles-stack — 17 repositories focused on backend Java/Spring Boot

ACADEMIC BACKGROUND

- **Bachelor's Degree in Information Systems** | UNIPAM (Patos de Minas University Center) | *Expected Graduation: 2030*
- **Technical Course in Administration** | UNIPAM | *Completed: 2025*

CERTIFICATES AND COMPLEMENTARY COURSES

- **Backend Developer Course (Alura)** – In progress: Java, RESTful APIs, Spring Boot, and application architecture
- **Java: Consuming APIs and Handling Errors (Alura)** – HTTP APIs, JSON, Gson, and external data consumption

LANGUAGES

- **Portuguese – Native**
- **English – B2 (Upper Intermediate)**
